

GEEKS AND GAMBLING EXPERTS MAKE MAD STACKS FOR CLIENTS

Picture Johnny Manziel rubbing his finger tips in the air or Floyd "Money" Mayweather showing off a photo of another million dollar-plus sports bet win on Instagram!

They are the images of winners -- but more importantly the joy, thrill, and financial success that MIT Cappers wants to bring to every day gamblers. The company founded by Vegas insiders has officially launched its proprietary gambling system for the general public. It had previously only been made available to private clients and investors.

"We've worked closely over the past five years with our team of high level MIT talent to gain a proven statistical advantage on sports betting," says MIT Cappers. "This proprietary algorithm allows these world class mathematicians, programmers, and insiders to pool their expertise so wagers can achieve high returns." "Vegas relies on math to defeat gamblers, but the playing field teeters toward us with our talented team," company leaders say.

MIT Cappers initially launched in 2010 and quickly built a strong reputation for servicing high net worth individuals in the Sports Betting industry. "You too can now enjoy the same achievements our high level clients have been enjoying for years," company leaders say. MIT Cappers has created membership packages for all levels of sports gamblers.
